

DATALOGIC BEGINS LANDMARK PARTNERSHIP WITH PROPHESSEE

Paris, September 30th, 2022. Datalogic, a global technology leader in the automatic data capture and factory automation markets, and Prophesee SA, inventor of the world's most advanced neuromorphic vision systems, announce their recent collaboration regarding the next generation of industrial products.

Datalogic is working with Prophesee to evaluate how this highly innovative platform can bring greater value to its upcoming breakthrough products.

"We are conducting a very fruitful partnership with Prophesee. Neuromorphic vision is a fascinating technology inspired by the behaviour of the human biological system, exactly like Neural Networks. We believe that the combination of these technologies will provide innovative solutions to our customers' needs", said Michele Benedetti, Chief Technology Officer at Datalogic.

"Our partnership with Datalogic is a testament to the commercial readiness of our Metavision platform and its ability to meet a growing range of vision challenges. We look forward to continuing to work together, to evolve Datalogic's advanced vision systems", said Luca Verre, co-founder and CEO of Prophesee.
