

DATALOGIC AT SITL 2025: SMART SOLUTIONS FOR EFFICIENT SUPPLY CHAINS

Paris, March 26, 2025 – Paris will host SITL 2025, the premier event for the transportation and logistics sector. From April 1st to 3rd, global industry leaders will gather at Paris Porte de Versailles, and among them, Datalogic will be at the forefront, showcasing cutting-edge technologies at Booth K088 – Pavilion 1.

Datalogic's solutions streamline logistic processes across their entire supply chain. The company provide the ultimate "Print & Read" experience, combining high-performance scanning with precision printing for flawless logistics operations.

Our combined solutions address the challenges faced in Courier, Express, and Parcel (CEP) environments, covering everything from high-speed sorting to intralogistics operations, as well as shipping activities and reverse logistics processes.

At SITL 2025, visitors can experience:

- Live demonstrations of Datalogic mobile computers, including the Skorpion™ X5 XLR and our brand-new Memor™ 12-17, paired with our Bluetooth® wearable scanners CODiScan™, delivering fast and accurate data capture, enhanced inventory management, and fewer picking and sorting errors.
- Datalogic's high-performance handheld scanners, such as the PowerScan™ 9600 series, offer the ideal solution for manual fulfillment: excellent ergonomics, top-tier reading performance, and added-value features like capturing and storing color images.

Join our experts at Booth K088 – Pavilion 1, Paris Porte de Versailles, to discover how Datalogic's innovative solutions are shaping the future of logistics, driving smarter, more efficient supply chains.
