

JOIN DATALOGIC AT NRF 2025: RETAIL'S BIG SHOW ASIA PACIFIC

Bologna, Italy – May 26, 2025 – Following several years of successful participation at NRF in New York, Datalogic has decided to exhibit at the second edition of NRF Asia Pacific, taking place from June 3–5, 2025, in Singapore, recognizing the strategic importance and strong growth potential of the Asian retail market.

At Booth 305, Datalogic will co-exhibit with Diebold Nixdorf, its strategic partner and a global leader in checkout technology. Together, we will showcase joint solutions designed to enhance the customer experience and streamline retail operations through integrated, intelligent automation. Visitors to the booth will have the opportunity to explore Datalogic's latest technologies for loss prevention and self-checkout, including:

- Fixed retail scanners, such as the Magellan™ 9900i, designed to accelerate checkout speed and minimize inventory shrink.
- Presentation barcode scanners, especially the Magellan™ 900i, offer compact yet powerful scanning capabilities for convenience stores, self-checkouts, access control systems, and kiosks.
- Mobile computers, like the new Memor™ 12, developed to boost in-store efficiency and staff productivity.
- Handheld scanners from Datalogic's Gryphon™ Series, delivering fast and accurate data capture for a wide range of retail applications.

We invite you to join Datalogic at NRF APAC 2025, from June 3–5 at Marina Bay Sands, Singapore – Booth 305, to explore how our latest innovative solutions are driving the next generation of retail efficiency and customer experience.
